ABOUT

Servizi Ospedalieri which is the leading firm of Laundry and Sterilization in Italy has been providing services in this field for a long time. By merger with Omasa firm, Servizi Ospedalieri has become the prominent exogenous surgical instruments provider in Italy. Thus, it can provide a wholistic service in the systematic leasing field. Its biggest difference from its competitors is presenting flexible and personal solutions to its clients in consequence of technologic research and development studies.

Sterile sets which are manufactured in sterilization centers of Servizi Ospedalieri have CE Conformity Certificate (CE Mark). This certificate indicates that every product set meets basic requirements in accordance with 93/42/EEC European directives and these products are acceptable to sale in nationwide and European wide. A product with a CE mark means guarantee and assurance for user and final user.

Technological research and innovation are the most important features for Servizi Ospedalieri.

Each year Servizi Ospedalieri provides;

- Processing over 40 million kg hospital textiles
- Bed management more than 45.000
- 100.000 surgical enterprise guarantee

◀ Our Services

- ▶ Disinfection - Sterilization
 - ▶ Surgical Textiles Sterilization
 - ▶ Surgical Instruments Sterilization
- ▶ Systematic Hiring
(Hospital Textiles and Surgical Instruments)
- ▶ Laundry (Laundry Room Management)
- ▶ Logistics

STERILIZATION

Our Sterilization service is split into two; Surgical Textiles and Surgical Instruments.

SURGICAL TEXTILES STERILIZATION

In the field of surgical textiles sterilization, only field-qualified and educated personnel who can work with hospital professionals are employed, and these services are managed in accordance with current health services standards.

Centralization of sterilization operations with only one service provider optimizes performance, raises efficiency, quality, and safety standards, as well as becoming an expense in budget.

◀ Sterilization and management of surgical textiles

- ▶ Management of Sterile Supply Departments
- ▶ Inventory holding of surgical textiles

EOS can manage the whole process of sterilization of the textiles used in surgical operations.

◀ Stages of surgical textiles sterilization service

- ▶ Soiled handling and sorting of surgical textiles.
- ▶ Packaging
- ▶ Sterilization
- ▶ Storing
- ▶ Delivery

Sterile Supply Departments under EOS management are designed to meet every need of the customers for sterile package production.

SURGICAL INSTRUMENTS STERILIZATION

Surgical instruments sterilization service is managed professionally in accordance with standards by qualified expert and educated personnel. Centralization of sterilization operations with only one service provider optimizes the performance, raises efficiency, quality and safety standards also simplifies budget management.

< Sterilization and management of surgical instruments

- > Management of Sterile Supply Departments
- > Inventory holding and maintenance of surgical instruments

EOS can manage whole process of sterilization the instruments used in surgical operations.

< Stages of surgical instruments sterilization service

- > Soiled handling and sorting of surgical instruments.
- > Washing and Disinfection
- > Packaging
- > Sterilization
- > Storing
- > Delivery

EOS manages the whole process of sterilization for the instruments used in surgical operations.

EOS supports with an expert team in the subjects of working protocols of all production and management processes, definition of controlling and monitoring systems, and specialization of sets.

◀ **Design, Manufacture and Management of Sterile Supply Departments**

EOS has an extremely specialized technical team which designs Sterile Supply Departments for surgical operation room textiles.

EOS also deals with the following:

- ▶ Design of structure and layout
- ▶ Construction of centers, equipment and furniture providing.
- ▶ Central management by its own staff.
- ▶ Special courses and seminars for personnel
- ▶ Can also provide consultancy about all sterilization operations.

SYSTEMATIC HIRING

EOS performs systematic hiring which is a special leasing method in the subjects of surgical textiles, hospital textiles and surgical instruments. This system includes hiring necessary surgical textiles, hospital textiles and surgical instruments to the hospitals provided by us where necessary. Thus, chain will not be broken due to lack of any equipment and quality of our service does not decrease. Also a perfect solution is generated in a delicate subject like this one.

Systematic hiring service is developed for perfection and quality of operating the process with holistic solution approach. EOS performs systematic hiring service only for the hospitals it provides sterilization and laundry services.

EOS uses a system which is tested and developed for performing the sterilization of reusable surgical textiles in surgical operating rooms, hospital textiles and surgical instruments in accordance with current health standards and management for reusable sterile materials. It is a service system that combines generates special sets for every surgical specialty, fabrics manufactured with newly developed materials, expert assistance (beginning, education, consultancy) and traceability of supplying service (stock control, expiring date control, device monitoring data system).

System proposes maximum comfort, protection and environmental coherence to surgical team by anticipating use of clothes and scrubs in accordance with mostly advanced European standards (EN 13795). This system proposes use of three layered and microfiber scrubs/fabrics. Textile materials used for surgical operations are liquid proof and have a breathing character due to its diminished particles. Also through their physical features, they can be reused after every sterilization term with keeping their features. Product describing and traceability are provided due to their own software system and bar coding of this system. This system can show in which state are both surgical textiles products and surgical instruments.

Where necessary, surgical textiles, hospital textiles and surgical instruments can be hired by our company.

LAUNDRY ROOM MANAGEMENT

Laundry and hiring services can be provided in hospitals' laundry facilities. The personnel collects the laundry to do from departments and delivers clean textiles. Laundry room management also includes some important services for health establishments:

- By IT system support, input-output and stock control of the materials.
- Analyses of maximum and standard consumption amounts of all products with respect to departments.

These provide logistic models fit customer's flow need.

Laundry and hiring services can be provided in hospitals' laundry facilities.

Centralization of the entire process of surgical instruments optimizes performance.
